

Section 1: Identification of Chemical, Product and Company

Address: Unit 5/92 Township Drive, Burleigh Heads, Queensland, 4220
Telephone: 07 5576 6388
Web/E-mail: www.belmacil.com or info@belmacil.com
Substance: Liquid solution
Trade name: Belma-Remove Tint and eye make up remover
Other Names:
Product Use: Make up or tint stain removal
Creation Date: October 2014
Revision Date: October 2019

Section 2: Hazards Identification

Statement of Hazardous Nature and Dangerous Goods Information

This product is classified as: Non-Hazardous according to the criteria of Work Safe Australia and in accordance with the ASCC. Not a Dangerous Good according to the Australian Dangerous Goods (ADG) code.

Risk Phrases: Not Hazardous – No criteria found.
Safety Phrases: None allocated
SUSDP Classification: None allocated.
ADG Classification: None allocated. Not a Dangerous Good under the ADG Code.
UN Number: None allocated
Poison Schedule: None allocated

Emergency Overview

Physical Description & Colour: Liquid, very pale yellow to straw in colour
Odour: Characteristic
Major Health Hazards: No significant risk factors have been found for this product.

Potential Health Effects

Inhalation:

Short Term Exposure: Available data indicates that this product is not harmful.
Long Term Exposure: No data for health effects associated with long-term inhalation.

Skin Contact:

Short Term Exposure: Available data indicates that this product is not harmful. It should present no hazards in normal use.

Long Term Exposure: No data for health effects associated with long-term skin exposure.

Eye Contact:

Short Term Exposure: This product is believed to be mildly irritating, to eyes, but is unlikely to cause anything more than mild transient discomfort.

Long Term Exposure: No data for health effects associated with long-term eye exposure.

Ingestion:

Short Term Exposure: Low oral toxicity, seek medical advice.

Long Term Exposure: Not data for health effects associated with long-term ingestion.

Carcinogen Status:

ASCC: No significant ingredient is classified as carcinogenic by ASCC.

NTP: No Significant ingredient is classified as carcinogenic by NTP.

IARC: No significant ingredient is classified as carcinogenic by IARC.

Section 3 – Composition/Information on Ingredients

INCI NAME	SOURCE	PURPOSE
Purified Water	CTFA	Solvent
PEG-150 Disterate	CTFA	Thickener
Glycerin	CTFA	Humectant
Disodium Laureth Sulphosccinate	CTFA	Surfactant
Sodium Lauroamphoacetate	CTFA	Surfactant
Polysorbate 20	CTFA	Surfactant
PEG-120 Methyl Glucose Dioleate	CTFA	Surfactant
Sodium Lauroyl Sarcosinate	CTFA	Surfactant
Disodium Lauroamphoacetate	CTFA	Surfactant
PPG-26-Buteth-26/PEG-40	CTFA	Solubiliser
Hydrogenated Castor Oil		
Citric Acid	CTFA	pH adjuster
Benzophenone-4	CTFA	Sunscreen
Disodium EDTA	CTFA	Chelating Agent
Phenoxyethanol	CTFA	Preservative
Methyl/Ethyl/Propyl/Butyl Parabens	CTFA	Preservative
Isobutylparaben	CTFA	Preservative
Methyldibromo Glutaniirile	CTFA	Preservative
FD & C Yellow No. 5	CTFA	Colourant
FD & C Yellow No. 6	CTFA	Colourant

* Ingredients vary between products. List of ingredients will appear on individual product labels.

This is a commercial product whose exact ratio of components may vary slightly. Minor quantities of other non-hazardous ingredients are also possible.

This ASCC TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 (eight) hour working day for a 5 (five) day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equalled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 (four) times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.

Section 4 – First Air Measures

General Information:

Call The Poisons Information Centre immediately if you feel that you may have been poisoned, burned or irritated by this product. The number is 13 1126 from anywhere in Australia (0800 764 766 in New Zealand) and is available at all times. Please have this Material Safety Data Sheet on hand when you call.

Inhalation: Normal safety measures should be observed.

Skin Contact: Irritation is unlikely. However, if irritation does occur, flush with lukewarm, gently flowing water for 5 minutes with remove product.

Eye Contact: Immediately flush the contaminated eye(s) with lukewarm, gently flowing water for 5 minutes or until the product is removed, while holding the eyelid(s) open. Obtain medical advice immediately if irritation occurs. Take special care if exposed person is wearing contact lenses.

Ingestion: If product is swallowed or gets in mouth, do NOT induce vomiting; wash mouth with water and give some water to drink. If symptoms present or develop, or if in doubt contact a Poisons Information Centre or a doctor.

Section 5 – Fire Fighting Measures

Fire and Explosion Hazards: There is no risk of an explosion form this product under normal circumstances if it is involved in a fire.

Extinguishing Media: Not Combustible. Use extinguishing media suited to burning materials.

Fire Fighting: If a significant quantity of this product is involved in a fire, call the fire brigade.

Flash Point: Does not burn

Upper Flammability Limit: Does not burn

Lower Flammability Limit: Does not burn

Auto Ignition temperature: Does not burn

Flammability Class: Does not burn

Section 6: Accidental Release Measures

Accidental Release:

Personal Protective Measures: Use disposable gloves

Environmental Protective Measures: Not applicable

After Spillage/Leakage: Remove mechanically, rinse with water

Additional Measures: Not applicable

Section 7: Handling & Storage

Handling: Keep exposure to this product to a minimum.

Storage: Store packages of this product in a cool, dry place below 25C and away from direct sunlight. Check packaging – there may be further storage instructions on the label.

Section 8: Exposure Controls and Personal Protection

The following Australian Standards will provide general advice regarding safety clothing and equipment:

Respiratory equipment: AS/NZS 1715, Protective Gloves: AS 2161, Industrial Clothing: AS2919, Industrial Eye Protection: AS 1336 and AS/NZS 1337, Occupational protective Footwear: AS/NZS2210.

ASCC Exposure Limits **TWA (mg/m³)** **STEL (mg/m³)**

Exposure limits have not been established by ASCC for any of the significant ingredients in this product.

No special equipment is usually needed when occasionally handling small quantities. The following instructions are for bulk handling or where regular exposure in an occupational setting occurs without proper containment systems.

Ventilation: No special requirements are normally necessary for this product. However make sure that the work environment remains clean and that vapours and mists are minimised.

Eye Protection: Not applicable

Skin Protection: Not applicable

Protective Material Types: Not applicable

Respirator: Usually, no respirator is necessary when using this product. However, if you have any doubts consult the Australian Standard mentioned above.

Section 9: Physical and Chemical Properties

Physical Description & colour: Very pale yellow to straw coloured liquid

Odour: Characteristic

Volatiles: Water component

Water Solubility: Completely soluble in water

pH: 6.70 – 7.20 (ie. Essentially neutral)

Specific Gravity @ 20°C 0.9900 – 1.00

Flash Point: N/A

VOC %: 0

Section 10: Stability and Reactivity

Reactivity: This product is unlikely to react or decompose under normal storage conditions. However, if you have any doubts, contact the supplier. Shelf life for this product is 2 years or 12 months after opening.

Conditions to Avoid: This product should be kept in a cool place, preferably below 25°C. Oxidation will occur if the product is not correctly sealed.

Incompatibilities: No particular incompatibilities

Fire Decomposition: Only small quantities of decomposition products are expected from this product at temperatures normally achieved in a fire.

Hazardous Polymerisation: Will not occur

Minimum durability before opening: 24 months

Minimum durability after opening: 12 months

Section 11: Toxicological Information

According to current information, when handled and stored correctly no effects damaging to ones health occur.

Labelling is not required according to the latest EEC regulations.

Skin: Essentially non-irritating

Eyes: only possible when applied directly

Sensitization: Essentially not a potential sensitizer on ingredients assessment

Section 12: Ecological Information

No ecological or special considerations apply for use of normal pack sizes.
Not considered environmentally harmful from normal dilution, expected usage and typical drainage to sewers, septic systems and treatment plants.

Section 13: Spillage and Disposal Considerations

Spillage: Collect as per Section 6
Method of Disposal: There are many pieces of legislation covering waste disposal and they differ in each state and territory, so each user must refer to laws operating in their area. In some areas, certain wastes must be tracked. The hierarchy of controls seem to be common – the user should investigate: Reduces, Reuse, and Recycle and only if all else fails should disposal be considered. Note those properties of a product may change in use, so that the following suggestions may no always be appropriate.
Package Disposal: Dispose of product and packaging according to a recognised method of chemical waste disposal.

Section 14: Transport Information

ADG Code Classification: Not classified as a hazardous material or as a Dangerous good. No special transport conditions are necessary unless required by other regulations

Section 15: Regulatory Information

AICS: All of the significant ingredients in this formulation are compliant with NICNAS regulations and EEC regulations.

Section 16: Other Information

This MSDS contains only safety-related information. For other data see product literature.

ACRONYMS:

ADG Code Australian Code for the Transport of Dangerous Goods by Road and Rail
